

1. (Amended) A theme pillow assembly for playing peek-a-boo hide and seek with at least one item, comprising:

a cushioning member, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

a first cavity, said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning medium;

at least one item removeably situated in said first cavity;

a first door connected to said front surface, and said first door openable to an open position for revealing at least a portion of said first cavity and closeable to a closed position over said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity;

wherein said first cavity sidewall perimeter surface billows inward toward said first cavity to snuggly hold said at least one item; and,

wherein at least one of said cushioning member and said first door have indicia, said at least one item and said indicia together visually indicating an illustrated theme.

15. (Amended) The theme pillow assembly of claim 1, wherein said cushioning member includes an outer perimeter surface, said outer perimeter surface connected to an outer perimeter of said [first] front surface and connected to said [second] back surface, said outer perimeter surface providing depth to said cushioning member.

23. (Amended) A cushion article for removeably receiving an item, comprising:

- a first surface having an outer perimeter;
- a second surface connected to said first surface at said outer perimeter;
- a cushioning medium, said cushioning medium located between said first surface and said second surface;
- a first cavity, said first cavity being a three dimensional void encircled by said cushioning medium and being generally encircled by said first surface, said first surface including a front surface, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface and said first cavity floor surface generally defining said three dimensional void, said first cavity sidewall perimeter surface billowing toward said three dimensional void, at least when said void is empty, for snuggly holding yet removeably receiving the item, an opening to said first cavity being encircled by said front surface; and,
- a first door, said first door connected to said first surface and openable to an open position and closeable to a closed position, said first door overlaying said first cavity in said closed position.

NEW CLAIMS:

26. (New) The theme pillow assembly of claim 25, wherein said item includes a stuffed toy.

27. (New) The theme pillow assembly of claim 25, further comprising a sound device.

28. (New) The theme pillow assembly of claim 25, wherein said cavity opening has a circumference and where said third layer has a larger circumference than said cavity opening circumference so as to overlay a portion of said first layer of material.

29. (New) The theme pillow assembly of claim 25, wherein said cavity floor layer is attached to said second layer for preventing said cavity sidewall perimeter layer and said cavity floor layer from turning inside out.

30. (New) The theme pillow assembly of claim 25, wherein an outer perimeter of said theme pillow assembly has an outline that is shaped to further indicate said theme.

31. (New) The theme pillow assembly of claim 25, further comprising a outer perimeter layer of material, said outer perimeter layer of material connected to an outer perimeter of said first layer of material and an outer perimeter of said second layer of material, said outer perimeter layer of material providing depth to said theme pillow assembly.

32. (New) The theme pillow assembly of claim 31, further comprising a second cavity, said second cavity having a second cavity sidewall perimeter surface which generally encircles a three dimensional void of said second cavity, said second cavity generally encircled by said cushioning medium.

33. (New) The theme pillow assembly of claim 25, further comprising a tunnel, said tunnel having a tunnel opening in said cavity sidewall perimeter layer, and said tunnel being a passageway located in between said first layer and said second layer.

34. (New) A theme pillow assembly for playing peek-a-boo hide and seek with at least one item, comprising:

 a cushioning member, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

 a first cavity, said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning medium;

 at least one item removeably situated in said first cavity;

a first door connected to said front surface, and said first door openable to an open position for revealing at least a portion of said first cavity and closeable to a closed position over said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity;

wherein said cushioning member includes a shell, said shell housing said cushioning medium, and said shell comprising quilted fabric material; and,

wherein at least one of said cushioning member and said first door have indicia, said at least one item and said indicia together visually indicating an illustrated theme.

35. (New) A theme pillow assembly for playing peek-a-boo hide and seek with at least one item, comprising:

a cushioning member, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

a first cavity, said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning medium;

at least one item removeably situated in said first cavity;

a first door connected to said front surface, and said first door openable to an open position for revealing at least a portion of said first cavity and closeable to a closed position over

said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity;

 further comprising an attached structure bridging at least a portion of said first cavity; and,

 wherein at least one of said cushioning member and said first door have indicia, said at least one item and said indicia together visually indicating an illustrated theme.

36. (New) A theme pillow assembly for playing peek-a-boo hide and seek with at least one item, comprising:

 a cushioning member, said cushioning member including a cushioning medium, a front surface and a back surface, said front surface and said back surface being connected along an outer perimeter of said cushioning member, said cushioning medium being between said front surface and said back surface;

 a first cavity, said first cavity recessed from said front surface into said cushioning member, said first cavity having a first cavity opening, a first cavity sidewall perimeter surface and a first cavity floor surface, said first cavity sidewall perimeter surface connected to said first cavity floor surface, and said first cavity sidewall perimeter surface encircled by said cushioning medium;

 at least one item removeably situated in said first cavity;

 a first door connected to said front surface, and said first door openable to an open position for revealing at least a portion of said first cavity and closeable to a closed position over said first cavity for concealing said at least a portion of said first cavity and said at least one item situated in said first cavity;
